PERSONAL PROJECTS

Train schedule web-app

Stacks used JavaScript, jQuery, HTML, CSS, REST API
Frameworks used: jQuery
In this project I created a web-app which lets users select any train station in Finland and see selected stations and which trains are departing in near future.

GitHub: https://github.com/federaljules/Train_JavaScript
Webpage: http://1800705.azurewebsites.net/Train_JavaScript/

Weather web-app

Stacks used: JavaScript, HTML, CSS, REST API
Frameworks used: jQuery

User can write city in the input box and search that city's current weather, 5 day weather or use user GPS location to determine location.

Webpage: http://1800705.azurewebsites.net/saa

Ionic 4 Mobile app development and design tasks

Stacks used: TypeScript, HTML, SCSS
Frameworks used: Angular, Ionic 4

- Mobile UX and UI design principles and best practices
- Creating Firebase database connection and authentication.
- Using different components such as sliders, side menu, tabs and label.
- Prototyping with online tools
- Simple and professional mobile app design
- Projects and tasks can be found in my GitHub
